

# 2013 SHANE OBSERVATIONAL WORKSHOP AT LICK OBSERVATORY

Honoring Mary Lea and C. Donald Shane, kindly funded by a donation from Virginia Trimble (UC Irvine)

These photos capture some of the terrific experiences enjoyed by the PhD students of the UC campuses: Berkeley, Davis, Santa Cruz, Riverside, Irvine, Los Angeles, Santa Barbara, and San Diego. The 20 participants, a mix of first and second year students, were given lectures on CCD and IR astronomy, Adaptive Optics, and hands-on training in experimental design, observational techniques, data acquisition, and data reduction. The course was designed, developed, and led by Lick Support Astronomers Elinor Gates and Paul Lynam with support from Kelsey Clubb, Patrick Maloney and Lick/UCO staff. We look forward to next year's event!
